

Pinnacle Engineering Signs Multi-Year Contract to Provide PdM Inspections for Wind Power Generation Leader

(Independence, KS – Apr 2017)

The multi-year contract will provide PdM inspections utilizing infrared imaging, ultrasound detection and UAVs for inspection of Medium and High-voltage utility assets for 19 sites across 7 states.

The Pinnacle Engineering team brings years of experience in improving maintenance and reliability programs along with the newest technology and training.

“We are excited to do whatever we can to increase uptime and reduce unplanned outages,” said Pinnacle Engineering lead engineer Mark Easter. “We have recently added staff and equipment to gear up for this year’s inspection season. We are chomping at the bit to dive in”, he added.

About Pinnacle Engineering

Pinnacle Engineering (Independence, KS) specializes in infrared, PdM, ultrasound, electrical testing and other consulting services, including Roof Asset Management and landfill inspections.
